

New! Video Surveillance Camera Disguised as a Light Bulb!

SecureView is safer than wireless. It's 'near-wireless' and uses the existing wires in your building.

All you need is a light socket and a TV and you have an instant home or office live motion, video surveillance system!

- **No finicky antenna**
- **High quality, sturdy design**
- **Impressive screen resolution**
- **Long camera range**
- **Doesn't broadcast video in the public air waves**
- **Uses your home's wiring**
- **No need for professional installation**
- **No drilling, wiring, or special mounting**
- **Needs no tools to install**
- **Moves easily...in seconds**
- **Take it with you wherever you go: room-to-room or house-to-house**
- **Works with any TV or VCR**
- **Great indoors and outdoors**
- **Even videos in pitch darkness**
- **Installation and operation couldn't be easier!**
- **90-day guarantee**

INSTALLATION IS EASY!

- 1 screw the camera into your light socket
- 2 connect the RCA cable into any TV or VCR
- 3 plug the decoder into your wall outlet

And you're ready to go!

Product includes:

- camera disguised as a light bulb
- decoder to plug into wall
- RCA cable to plug into TV/VCR

Monitor your home or business...day and night

TV not included

A diagram showing the camera being screwed into a light socket and the decoder being plugged into a wall outlet. A TV is shown displaying the camera's feed. Arrows indicate the connection points for the RCA cable.

Use Secureview as a baby video monitor or to watch your front door!
