

AgriAlert

AGRI-ALERT 2400

Protect your equipment from the following most common causes of investment loss:

- Problems with water supply
- Faulty Heater (low temperature)
- Failure In Control Equipment (climate controllers)
- Fan Failure
- Power Failure

FEATURES:

- **8 supervised zones that can be activated or bypassed individually or in groups.
- **Expandable to 24 zones using expansion cards- 8 zones per expansion card.
- **Zones can be configured for dry contact, temperature, 4-20 ma input, 0-5 volt input, pulse count, or burglary.
- **2 output relays operable from the keypad or by remote phone.
- **Built-in or remote microphone for on-site listening.
- **Remote cancel capabilities for siren or revolving light output.
- **Outdoor temperature response feature (uses 1 output).
- **Can call up to 8 different phone numbers.
- **Programmable system ID message.
- **Auxiliary 12 volt DC power supply.

SYSTEM FLEXIBILITY

- >> Zone configuration: dry contact, temperature, 0-5 V, 4-20MA, pulse count
- >> Easy bypass and activation of entire buildings through "super zones"
- >> Built-in or remote microphone for on-site listening.
- >> Programmable alarm recognition delays on individual zones
- >> 2 outputs to take direct actions on the building from a remote location
- >> Transmission of alarm to pagers, cellulars, telephones

SPECIAL "CAN'T IGNORE ALARM" FEATURE

If an alarm situation is acknowledged but not resolved within a given period of time, the system will launch another dial-out.

SECURITY

- >> Up to 10 programmable user access codes
- >> Output for local siren or revolving light
- >> Self-testing of complete system (fuses, battery, etc)
- >> Phone line seizure
- >> 12 volts rechargeable battery backup

STATUS REPORT ON EACH ZONE

Check both the temperature and technical functions of the entire system from a remote telephone.

PROTECTION

Built-in protection for power supply against voltage surges and the telephone line.
Built-in protection on zone inputs against voltage surges.

MAXIMUM SURGE PROTECTION

Maximum protection from surges which is the most common cause of alarm system failure. Alert 2400 offers up to six times the protection against surges of most other alarms.

KEEP TRACK OF ALARM HISTORY

ALERT 2400 retains a record of sensors that went into alarm during the past armed period. The last 10 alarms are kept in memory (can be viewed from keypad).

DURABILITY

ABS enclosure – moisture and dust-tight for barn installations.

OUTDOOR TEMPERATURE COMPENSATION

As the outside temperature approaches the high alarm setting, the high alarm setting is automatically adjusted higher. No need to manually adjust the high alarm on hot days. Eliminates the common practice of shutting off the alarm during hot days and having no active alarm.

WARRANTY – 2 YEARS
