

SENSAPHONE Monitoring Sensor

General Accessories

2.8K Temperature Sensor with Glass Bead Vial

Description

The FGD-0107 is ideal for cold storage temperature monitoring. The glass bead filled vial will buffer any momentary fluctuations that may cause a preliminary alarm dial out, such as defrost cycles, opening of doors, and fans circulating air. The glass beads will slow the response time of the sensor allowing normal daily operations to occur without having an alarm initiated. This is a highly recommended sensor for every cold storage application.

Temperature Range:

400, 800: -20° to 150°F (-30° to 65°C)

1400, 1800, 2800, WEB600: -109° to 115°F (-85° to 57°C)

2000: -125° to 124°F (-87° to 51°C)

Express II: -85° to 200°F (-65° to 93°C)

Specifications

Package Contents

- (1) Temperature sensor with glass bead vial
- (1) 12' wire
- (1) Installation instructions

Temperature Range:

Differs depending on Sensaphone model. See above

Accuracy:

± 1°C (± 1.8°F)

Compatibility:

400, 800, 1400, 1800, 2800, 2000, StationSitter, Express II and WEB600
